A COOL MAN IN A HOT RACE

Never before has man ventured over the threshhold of a frontier so vast and complex. The millions who watched Colonel John Glenn thunder off the pad and who followed him by radio as he orbited the earth received the thrill of the century. In this historic moment, the only proven manned space trip, the United States entered the space age. The space experiments which have gone before have been spectacular but this one, open to the eyes and ears of the world and with a man involved, proved to be a day to remember. Nothing rings as clear and true as the genuine article. We feel a glow of pride in the accomplishments of our scientists and to a brave man who proved conclusively that human brain and skill are as neses-sary in space as they are on earth. This patriotic American carried the hope of countrymen through to success with one of the finest displays of cool courage ever witnessed. As in most untried, new models the space capsule had more than its share of "bugs". The fact that Glenn was aboard to control this flight proved to be of more real value than a perfect flight such as the kind the Russians claim. The very fact that there was trouble on this first flight has a real significance. The

secret Soviet claim has always seemed too good to be true. Certainly this kind of claim is too marvelous for proof, for no real information has ever been forthcoming. The United States is the only country engaged in this space exploration willing to reveal the results of their experiments to the scientists of the world. Khrushchev suddenly desires to join our team and this is somewhat curious. It was not too long since this very man scoffed to the world at the puny "grapefruit" that the U. S. put into space. For such a profound change of heart there must be a reason. Soon the entire world will not have to guess for the moment of truth is coming closer. Achievement will tell a story more clearly than any words, for fabulous steps are in the future.

The team of astronauts is dedicated to the advancement of the United States. Our future is in good hands for no money buys the total effort of brave men who work for their country. It is well that we have patriots of

determination for those who advance the U. S. are working in the interests of the world. No other country is so concerned for the future of other peoples and none offers a better example of the kind of life that self-governing people can build for themselves. It is important that the U. S. be upheld and strengthened in every field. Millions all over the world literally held their breath as that rocket fired. Australians lit their cities in greeting to a man advancing the knowledge of space by advancing his country in a new era. The people of the world recognize the importance of a strong United States just as they recognize the strength of a dedicated man, John Glenn.

ANOTHER HISTORIC MOMENT

Khrushchev called a conference and the President refused to obey the summons to the summit. This is mutinous, unheard of and heartening to Americans. This week the U. S. never had it so good.

The opportunity to go on the trip was furnished him by an invitation to visit with the family of his sister's college roommate. Except for his immediate family not many have kept up correspondence so comparatively little is known of this terrific experience. He is in a foreign country and of necessity has had to learn the language which he has mastered at least enough to understand and converse with people with whom he is associated. The dual thrill comes from the fact that he is a guest in the home of the owner of a ranch. He keeps busy during the week, riding, roping, branding cattle and acting in the capacity of a cowboy, working right along with the other hired hands. Week-ends he again becomes a guest and travels hundreds of miles by plane, auto, etc., visiting interesting South American places and cities, and observing the culture and interests of our neighbors to the South.

We understand it has been a once in a lifetime experience and takes on a new twist in our student age exchange.

We, as many others besides his parents, Mr. and Mrs. Anthony J. Pelson of Barstow Street, Mattapoisett, are looking forward to his return to learn first hand what his trip was like

In a way it resembles the real old days of this area when many young men went to sea in ships on whaling voyages and had many interesting things to tell of places they saw on the voyage.

There is available at the Post Office a part time job to help sort and case mail. 1 hour a day, 9:15 A.M. to 10:15 A.M., 6 days a week, 1.82 per hour. Apply to the Postmaster.
